esri UK Understanding our world.

Training the GIS Professional

Discover the ArcGIS Platform- 1 Day

Overview

The ArcGIS platform is continuously evolving with new capabilities being introduced all the time. This course will show you how the platform connects maps, apps, data, and people in ways that help organisations make more informed and faster decisions, extending the reach of GIS across the enterprise. ArcGIS accomplishes this by making it easy for everyone in an organisation to discover, use, make, and share maps from any device, anywhere, anytime.

Furthermore, ArcGIS is designed to be flexible, offering these capabilities through multiple implementation patterns and approaches.

Using four areas of the ArcGIS platform (ArcGIS Pro, ArcGIS Online, AppStudio and Operations Dashboard) you will discover how easy it is to construct an Asset Collection application and then display and analyse those assets to a wider audience.

Topics Covered

- Designing feature classes with attribute domains
- Sharing feature services to ArcGIS Online
- How to use AppStudio for ArcGIS
- Designing web maps in ArcGIS Online
- Creating operational views using Operations Dashboard for ArcGIS

Goals

In the course you will:

- Use ArcGIS Pro to define and build feature classes to hold your asset information
- See how you can publish these feature classes to ArcGIS Online for use within other areas of the ArcGIS platform
- Build a lightweight application using AppStudio for ArcGIS without the need for programming skills
- Go out and collect assets using your Asset Collection application
- Add you assets to a web map in ArcGIS Online
- Build an Common Operating Picture using Operations Dashboard for ArcGIS to share with a wider audience the information collected and answer questions about your assets

Who should attend

- Having a smart phone or tablet will be useful as this will allow you to take full advantage of the course sessions

- Please download the AppStudio Player from an app store if you are bring a smart phone or tablet

- No previous knowledge of the software is required
