Training the GIS Professional

ArcGIS Online: Advance your Skills - 2 Days

Overview

ArcGIS Online is growing with new capabilities and you should grow with it.

To keep up to date, this two-day course will extend your foundational Web GIS knowledge and explore further workflows when operating ArcGIS Online.

The course covers new functions of ArcGIS Online such as ArcGIS Data Pipelines, to exploring other visualisation techniques such as 3D and Time-enabled interactions, to advanced analytical capabilities such as spatial statistics and networks.

Whilst attending, you will engage with the Esri instructor, view demonstrations of all topics, but get to grips with hands-on exercises.

Who should attend

- ArcGIS Creator user type
- ArcGIS Professional user type
- ArcGIS Professional Plus user type

Goals

- Improve the efficiency of your data preparation & editing workflows
- Discover visualisations beyond 2D mapping
- Apply Tile, Network & Spatial statistical analysis to your research
- Look beyond the ArcGIS Online interface

Prerequisites

Attendance of our Introduction to your ArcGIS Online Subscription course or equivalent working knowledge.
