

Training the GIS Professional

Deploying & Maintaining a Multiuser Geodatabase (ArcGIS Pro) - 2 days

Overview

Support your organisation's data management workflows.

This course prepares you to successfully create a multiuser geodatabase that stores and manages your organisation's authoritative geographic data. Learn about the multiuser geodatabase architecture and apply techniques to efficiently load data, assign user privileges, and maintain performance over time.

Who should attend

- System Administrators
- Data Managers

Goals

- Create a multiuser geodatabase.
- Load and update data in a multiuser geodatabase.
- Configure user roles and permissions to provide secure data access.
- Apply best practices to optimise geodatabase performance.

Prerequisites

Completion of ArcGIS Pro 2 – Essential workflows for ArcGIS Pro or equivalent knowledge, and experience managing a relational database management system are required.

Software

Esri will provide the following software to use during class:

- ArcGIS Pro 2.x (Standard or Advanced)
- ArcGIS Enterprise 10.8.1 (Standard or Advanced)
- PostgreSQL 11.3
- Microsoft SQL Server 2014 Express Edition
- Oracle Database 11g Express Edition

Topics Covered

- What is a multiuser geodatabase?
- Connecting to the geodatabase
- Loading data into the geodatabase
- Configuring privileges
- Managing storage
- Maintaining the geodatabase
- Associating data
- Applying the geodatabase workflow
