

## Training the GIS Professional

# Get Started with ArcGIS Dashboards

- 1 day

### Overview

Enable at-a-glance insight.

This course is for anyone who wants to present a lot of data simply and effectively using visually engaging dashboards. Learn how to display multiple data visualisations on a single screen that supports dynamic data exploration, real-time operations monitoring, and informed decision-making. The course covers dashboard types, design considerations, layout options, and techniques to organise and focus dashboard elements to meet the specific information needs of your audience.

### Who should attend

- GIS Users

### Goals

- Add data from multiple sources to a dashboard.
- Configure dashboard elements, including maps, charts, indicators, and lists.
- Manage data display and maximise the visual impact of your dashboards.

### Topics Covered

- Using ArcGIS Dashboards to display data. Using a dashboard to display data; Benefits of a dashboard; Types of dashboards; Identify a dashboard's message; Using dashboards in an organisation
- Designing in ArcGIS Dashboards. ArcGIS Dashboards design questions; ArcGIS Dashboards elements; Design considerations for ArcGIS Dashboards elements; ArcGIS Dashboards layout options; Configuring dashboard elements based on design; Arcade expression language
- Configuring dashboard elements. Identify data sources for a dashboard; Using web map layers to display information; Layer capabilities; Applying dashboard data filters; Using a data series
- Configuring an interactive dashboard Interactive dashboards; Identify interactive capabilities of ArcGIS Dashboards; Configuring an interactive element

### Prerequisites

Familiarity with ArcGIS Online will be helpful. For those new to ArcGIS Online, completing the ArcGIS Online Basics web course is recommended but not required.

### Software

Esri will provide the following software to use during class:

ArcGIS Online  
ArcGIS Dashboards
