Training the GIS Professional

Mastering ArcGIS Survey123 - 1 Day

Overview

If your organisation is looking to deploy ArcGIS Survey123 to easily enable user friendly, form centric data collection, then look no further. This course introduces the ArcGIS Survey123 website, the web designer, Survey123 Connect and other capabilities to help build sophisticated data collection forms from scratch. You will have the opportunity to use your own iOS or Android device to complete some course exercises.

Who should attend

- Mobile Workers
- Survey Creators
- GIS Managers

Goals

- Introduce ArcGIS Survey123 components
- Create and configure simple and more complex surveys for form-based data collection
- Learn how to publish and share surveys
- Make better decisions based on the analysis and reporting capabilities

Prerequisites

- Attendance of our An Introduction to your ArcGIS Online Subscription course or equivalent working knowledge.

- A suitable iOS or Android device with the ArcGIS Survey123 app installed.
